Professional Summary

Computer Science graduate with foundational knowledge in Data Science, Python Programming, SQL, and Machine Learning. Currently undergoing professional training in Deep Learning, NLP, and Predictive Modeling. Skilled in problem-solving, data visualization, and front-end development with strong communication and teamwork abilities. Seeking opportunities in Data Science, Software Development, or AI-related roles.

Core Skills

- **Programming Languages:** Python, SQL, Java (Basics), C, R
- **Data Science:** Pandas, NumPy, Statistics, Data Cleaning, EDA, Machine Learning, Deep Learning
- **Visualization & Analytics:** Tableau, Microsoft Excel, Power BI (Basic), Dashboarding
- **Web Development:** HTML5, CSS3, JavaScript, Flutter, Responsive Design
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Firebase
- **Databases:** MySQL, Firebase Firestore, SQL Queries, Database Management
- **Soft Skills:** Communication, Leadership, Team Collaboration, Time Management

Education

B.Tech in Computer Science and Engineering

June 2025

APJ Abdul Kalam Technological University, Kerala, India

CGPA: 7.54

Professional Training

Data Science Intern

Present

Soften Technologies, Kerala

- Trained in Python for Data Science, Machine Learning, Artificial Intelligence, Deep Learning, and NLP.
- Hands-on learning in Data Cleaning, Feature Engineering, Statistical Analysis, and Predictive Modeling.
- Built dashboards using Tableau and practiced real-world analytics workflows.
- Exposure to Regression, Classification, Hypothesis Testing, and Model Evaluation.

Projects

Sketch to Realistic Image Generation using pix2pix GAN

Ongoing

- Developing an AI-powered system that converts hand-drawn sketches into realistic images using pix2pix GAN.
- Utilizing Python, TensorFlow, Keras, OpenCV, and NumPy for deep learning and image processing tasks.
- Implementing Generator and Discriminator networks with U-Net and PatchGAN architectures.
- Building a user-friendly interface for image upload, generation, preview, and saving using Streamlit/Flask.

Smart Shelf System

- Developed an intelligent shopping application using Flutter, Firebase, and Python.
- Implemented Firebase Authentication, Firestore database integration, wallet system, and receipt generation.
- Integrated QR code scanning and real-time cart management using OpenCV-based shelf tracking.
- Built features for product management, transaction history, and Firebase Storage integration.

Research Presentation: Edge Computing with AI

- Presented integration of Edge Computing and AI for real-time IoT applications.
- Highlighted reduced latency, better scalability, and enhanced security benefits.

Certifications

- | | |
|---|------|
| • Google Cloud Computing Foundations & Intro to Generative AI | 2024 |
| • Python for Data Science, AI & Development – IBM | 2026 |
| • Python Project for Data Science – IBM | 2026 |
| • Google Cybersecurity Professional Certificate – Google | 2024 |

Leadership Experience

Documentation Head – NSS Cell UNIT 224

- Maintained structured documentation of events, camps, and social initiatives.
- Coordinated week-long volunteer camp operations and participant activities.

Google Developer Student Clubs — WIT Lead

Jun 2023 – Jun 2024

- Organized initiatives empowering women in technology through workshops and mentorship.
- Fostered collaborative learning environments and leadership development.
